

Memorandum

TO: Todd Selig, Town Administrator
Gail Jablonski, Business Manager

FROM: Michael Lynch, Public Works Director

DATE: August 16, 2016

RE: **Recommended 2017 Public Works Budgets**

On behalf of the Department of Public Works, I am pleased to present our 2017 Public Works Budgets for your consideration and support. As in past years, the Public Works Budget is composed of several different points of view. One is DPW staff input regarding materials, supplies, services, and programs. Another is the department head's vision of the needs of the community, introducing new ideas and programs, while also evaluating and critiquing current operations. Each line item is analyzed for justification and was realistically estimated utilizing past history, market analysis or vendor quotations.

The 2017 Public Works Budget is comprised of 26 individual operational budgets and 23 Capital Improvements Plan (CIP) projects. The DPW budget also supports the operational needs of all other departments in the Town. For example, the Public Works budget covers the heating, electrical, building maintenance, contracted cleaning, and supply needs of most of these departments. Additionally, DPW also completes vehicle maintenance of all town departments except the Police and Fire Departments. The attached summary of totals, broken down by account, include all operating expenses and specific projects proposed by the Public Works Department and other Town departments that fall under DPW's budget.

To aid in your analysis and understanding as well as in preparation for the Town Council, most budget items have a brief description, rationale, and where applicable, a historical review of prior operational costs.

The 2017 budget request incorporates multiple LEAN initiatives and is intended to align itself with several Town Administration, Council, and Department goals such as streamlining operations and improving efficiencies. The current high level of municipal services will continue to be a priority for the Public Works Department. The department will also continue to explore new ways to increase the current levels of service at a reduced cost to the Durham taxpayer by fine-tuning all aspects of services that the department provides.

2017 HIGHLIGHTS

- The annual road resurfacing program remains the Public Works Departments top priority for 2017. The department request is \$449,999 for the 2017 program which includes the shimming and one inch asphalt overlay of Old Landing Road, Packers Falls Road, Simons Lane, and Spinney Lane.
- The Department will also upgrade the sidewalk on Mill Pond Road.
- The Parks and Recreation Department will benefit from two DPW projects; Renovations to the barn at Wagon Hill Farm and new holiday LED decorations downtown will provide energy efficiency and community pride.
- DPW vehicles to be replaced in 2017 include the 2000 Colson Sidewalk Snow Plow Tractor, 2005 ¾ Ton Pickup Truck and the 1998 John Deere Front End Loader.
- The Department proposes \$150,000 to start the process of engineering the dredging/restoration of the Mill Pond.
- The Transfer Station main building will undergo a major renovation.
- Street lighting upgrades will replace an old inefficient system with a highly energy efficient, LED street light program.
- Engineering for the Downtown Round-a- Bout is also included in the 2017 CIP.
- The Longmarsh Road culvert replacement project received its funding source through the FEMA Mitigation Program and construction should start early 2017.
- \$72,000 has been requested for the purchase and installation of an emergency backup Generator for the Town Hall complex.
- The Wastewater Division will continue its 10 year facility upgrade plan. This year's scope includes the replacement of all doors and windows and old lighting. Also we will conduct upgrades to the grit tanks, and primary clarifiers.
- Wastewater personnel will begin engineering for the replacement of the current 50+ year old 18" force main. This is the only wastewater force main from the Dover Road Pump Station to the Wastewater Treatment Plant.
- DPW has completed its investigation of the ownership and stability of the Littlehale Dam and will move forward with the recommendation of removal of the dam.

simple tasks are not getting completed or in some cases not occurring at all. Public Works is a crucial and dynamic department which strives to assist everyone and keep Durham a terrific place to live. Over the past few years, the quantity of work required by the DPW has become overwhelming. Unavoidable new rules or regulations in various capacities slow us down often but more recently it is the amount of unexpected small projects we are asked to assist on which drain our available resources. A few past examples are projects for the new Library and Town Hall, support at the Churchill Rink, the Oyster River Forest project, the Police shooting/firing range, the 2014 downtown traffic pilot, the ATO Parking Lot, just to name a few. Various others come up on a daily or weekly basis that we need to find the time to fit into our normal operation.

Please find below some additional concerns specific to staffing levels which we should have a discussion about.

- **WATER/WASTEWATER/STORMWATER** – With new State and Federal regulations in water, wastewater and stormwater, additional staff are currently needed in these areas. Water, currently staffed by one full time employee, is now mandated to coordinate or perform new backflow equipment testing as much as twice per year and in fall 2018, the current semi-annual water meter billing will be required quarterly. The addition of the new Spruce Hole well to the system and the addition of multiple new customers to the system will now stretch this one person department beyond their capacity.

The constantly growing Federal and State permit requirements, technically advanced upgrades, plus increased customers on the system put a huge stress on the limited staff at the Wastewater Treatment Plant as well. The 2012 Wastewater Facilities Plan considered Durham to be understaffed and recommended adding a 6th full time employee to be responsible for operations/collection systems.

On top of these crucial regular duties, during the winter months these staff members are pulled off to do snow removal.

The new EPA Stormwater MS4 permit is expected in 2017 and will require increased monitoring and testing of all stormwater outfalls as well increased mapping and tracking of the Town's entire stormwater system using GIS. A town-wide GIS position could be utilized to assist in completing these permit tasks as well as create, edit, update and generate utility maps for Water, Wastewater and Storm Water divisions. **One solution here could be a fulltime floating staff member working in the Wastewater, Storm Water and Water Divisions.**

- **DOWNTOWN** – DPW has consistently over the past few years spent more time in the core commercial area focusing on signage, trash collection, landscaping, motor vehicle, bicycle and pedestrian traffic/safety markings,
- **SNOW REMOVAL**- Snow removal has increased due to additional sidewalks and parking areas. Most of these areas must be maintained during the storm, no longer can snow be left for an extended period of time. The areas of concern are Madbury Rd., Garrison Ave, Pettee Brook Lane the Church Hill area, and the new Pettee Brook pedestrian bridge/walkway located adjacent in/to the Pettee Brook metered parking lot.

- **CONSERVATION LANDS** – Often, Public Works has to change its schedule to assist with an issue on hundreds of the acres of land now in conservation, for which there are no resources to draw from.

Regarding the two orange highlighted challenges above, please find the attached letter from Ellen Snyder, of Ibis Wildlife Consulting, recommending several strategies to deal with vegetation control and conservation lands.

DEPARTMENT OF
TOWN OF DURHAM, NH

Tel. 603-659-6250
Certified Wildlife Biologist

August 3, 2016

Mike Lynch
Director of Public Works
100 Stone Quarry Drive
Durham, NH 03824

Dear Mike,

At your request, this letter is a follow-up to our meeting on July 19, 2016, in which we discussed invasive plant management in the Town of Durham. This stems from a heightened awareness among Durham residents about the pervasiveness of invasive plants on private and public lands, and the desire for people to see something done to control the plants.

I suggest thinking about invasive plant management depending on ownership type:

- Homeowners
- Road rights-of-way (town and state)
- Town-owned lands
- Other conservation lands (e.g. UNH, Land Trusts, NHFG)

For homeowners, there are several excellent sources of information that you can refer people too. I would include an invasive plant page or place on the Town website where this information could be listed with links. Rather than having to visit every homeowner that calls, you could refer them to this information first. Some suggestions for resources to include (these websites have many resources that could be listed here as well):

- *Picking Our Battles: A Guide to Planning Successful Invasive Plant Management Projects* Available from NH Fish & Game <http://www.wildlife.state.nh.us/invasives/>
- UNH Cooperative Extension webpage on invasive plants: <http://extension.unh.edu/Forests-Trees/Invasive-Plants>
- NH Department of Agriculture invasive plant website: <http://agriculture.nh.gov/divisions/plant-industry/invasive-plants.htm>

The strategies needed to control and manage invasive plants are likely different for town (and state) road rights-of-way than for town-owned lands. In part, because roadsides are routinely managed for other purposes such as mowing for sight lines, clearing under utility lines, snowplowing, paving, grading, etc. A major priority along roads is to ensure that you are not inadvertently moving invasives along the road or to other areas with the equipment. If not already in place, you might develop a protocol for how to assess

For town-owned lands, including conservation areas and parks, plants are pervasive on these properties. Here are some suggestions:

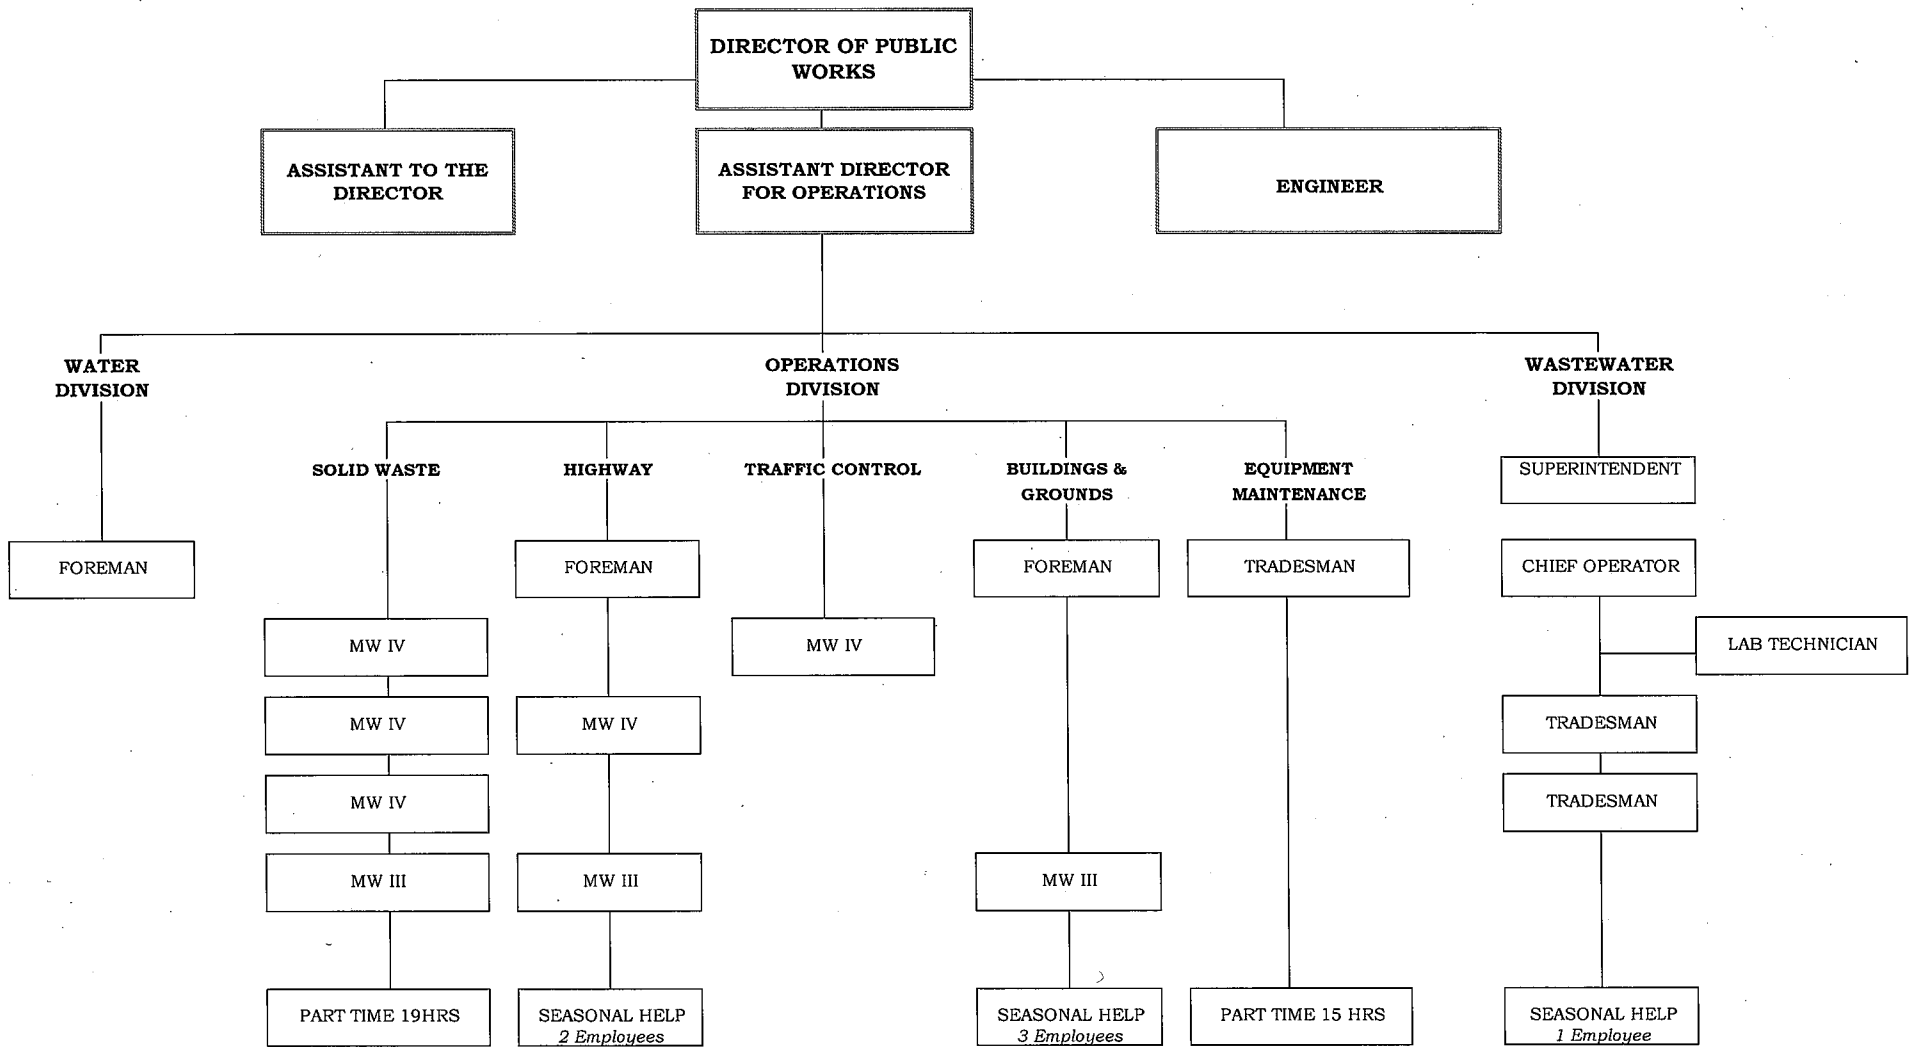

- The town has a large inventory of town-owned lands. You will not be able to control invasive plants on all of these parcels at the same time or even in the short term. You will need to prioritize. I would focus first on those areas that have already been targeted: Doe Farm and Oyster River Forest. These sites require sustained effort over 5-10 years to exhaust the seed supply and restore to native vegetation. The Trustees of the Trust Fund, Conservation Commission, and other partners are helping with these efforts. You might develop a priority list of which properties to be tackled if additional time and resources become available. It is easier to work on sites with fewer invasives.
- I suggest including information on the town website about any efforts related to invasive plant control and other vegetation management (in same place as other invasive plant information), so that the Durham community can follow updates.
- Invasive plants are easily and often moved inadvertently in compost, mulch, bark chips, sand, soil, gravel – basically any material that is being moved from one location to another. Whenever possible, you want to ensure that your source material is free of invasives before moving the material to a new location. And, invasive plants should not be composted at the town landfill or elsewhere, but disposed of by burning or similar approach. If no viable seeds or vegetative parts, piling onsite may be an option (such as what we are doing with wild parsnip at the Oyster River Forest).
- Invasive plant control is best achieved with a combination of resources: consultants, contractors, volunteers, town staff, and multiple funding sources. The Doe Farm and Oyster River Forest efforts are good examples.
- Given the large inventory of conservation and other town-owned lands in Durham, I strongly recommend that the Town create a position that is focused on natural resource/vegetation management. I envision someone with experience in natural resource planning, invasive species, tree care, working with volunteers and contractors. In other words, not an entry-level position. Perhaps the position could be shared with other towns, as they have the same need. Such a person could oversee and coordinate projects on conservation lands, work with consultants, organize and manage volunteer work days, meet with homeowners, write grants, collaborate with other landowners including UNH, NHFG, and local land trust. Without such a position, it will be hard for the town to keep up with its stewardship obligations and respond to community requests to take action.
- Going forward, any new acquisitions should be considered in regards to capacity (staff, time, and cost) to steward the parcel. If partners, such as the state or a land trust, can own the land instead of the town, then that might be a better option. The town could still hold an easement or executor interest.

I hope these suggestions are helpful. Feel free to contact me if you have any questions. Unfortunately, given other commitments and the amount of time that would be required, I am not able to assist with any comprehensive inventory, mapping, and planning of invasive plants.

Sincerely,

Department of Public Works Organizational Chart
