<i>Narrative for Column # 4</i>		Accounts for 80% of a full-time individual to perform parking enforcement within the Town of Durham (remaining 20% is budgeted under Police for evidence work). Parking has evolved dramatically over the past several years with the addition of 26 "pay and display" kiosks that accept every method of payment to include coin, paper currency, debit and credit cards. Each machine has a Wi-Fi connection to banks where the Town is credited with the funds. These are highly technical machines that require a year-round approach to maintenance, monitoring and ensuring that they are functioning properly. Such seemingly simple tasks such as replacing the paper in each machine so that the customer has a receipt to place on their vehicle dashboard requires constant attention by a trained person. Additionally we have instituted a year-round parking strategy for Depot Road, even during the summer months.

<i>Narrative for Column # 4</i>		We have experienced difficulty obtaining a single person for this task, so we have hired two persons, each working 20 hours a week. They are retained to work the 37 weeks of the UNH academic year to assist in parking enforcement.						
		The strategy of retaining a part-time clerk has ensured that there is significant focus placed on the ticket data input, billing, collection and statistical analysis of all parking funds. This position provides 25 hours per week to focus on administrative tasks associated with parking.

<i>Narrative for Column # 4</i>		This account pays for the uniforms that the three (3) their duties. With one full-time and two part-time employees as normal staffing, the uniform account should be stable. However, last year there was an unexpected resignation that resulted in the hiring and outfitting of two part-time personnel.

<p><i>Narrative for Column # 4</i></p> <p>The department uses an iPad to monitor the machines via the internet while on patrol. This allows parking personnel to immediately respond to a failed machine and take appropriate action to get the kiosk back on-line. Monthly data fees for service are through Verizon.</p>								
<b>05-4000-566-26-000</b>	Postage - Parking	1,690.88	1,827.28	1,200.00	1,200.00	1,200.00	1,200.00	1,200.00
<p><i>Narrative for Column # 4</i></p> <p>This account pays for the postage associated with the mailing of notices to violators who have failed to pay their parking fines. Last year this account over-expended due to a significant number of tickets not being paid and notices being sent to recover fines. The line is being increased due to that possibility of occurring in 2018.</p>								
<b>05-4000-566-27-000</b>	Printing - Parking	3,827.80	4,038.00	3,000.00	4,200.00	4,200.00	4,200.00	4,200.00
<p><i>Narrative for Column # 4</i></p> <p>This account pays for the printing of multi-faceted tickets that include self-addressed envelopes that hopefully encourage violators to quickly pay their fines. In addition, the large volume of envelopes and letterhead used to alert non-payment of violations is supported by this account.</p> <p>With three (3) PEO's on duty, more violations are being noted and tickets issued causing an increase in this account.</p>								
<b>05-4000-566-35-000</b>	Work study (non payroll wages) - Parkii	0.00	0.00	0.00	10,000.00	10,000.00	10,000.00	10,000.00
<p><i>Narrative for Column # 4</i></p> <p>This is a new initiative to hire several work-study students to augment parking enforcement personnel throughout the year. This mutually beneficial program will allow for a more robust presence in the downtown area during peak-hours.</p>								
<b>05-4000-566-36-000</b>	Contracted Services - Parking	70,141.04	87,809.18	60,800.00	69,100.00	69,100.00	69,100.00	69,100.00
<p><i>Narrative for Column # 4</i></p> <p>The new kiosk meter system employs wireless technology so that credit and debit cards may be utilized. This capability requires access and support from various vendors. The account manages the payment for wireless services as well as credit card support via various banking establishments.</p> <p>As an example, during June of 2016 the 26 kiosks brought in \$19,000 but the cost for use of credit cards to the vendor and banks was \$5,400. The higher the usage, the higher the fees.</p> <p>Due to the volume of parking, monthly charges to the Town were approximately \$4,700 per month with charges to Ventek approximately \$400 per month.</p>								
<b>05-4000-566-52-000</b>	Equip Maint (Other Than Office) - Parki	21,823.33	35,768.02	18,000.00	29,000.00	29,000.00	29,000.00	29,000.00
<p><i>Narrative for Column # 4</i></p> <p>The Town has completely reverted to a pay and display system by installing kiosks that credit, debit cards, paper and coins for payment. The new machines are technologically sophisticated to accept all of these payment methods and have Wi-Fi capability, money counters and other nuances that require routine maintenance. The warranty on each machine has expired resulting in extended warranties on each machine at almost \$1,000 per machine. While significant, some of the more sophisticated items on the maching would vastly cost more.</p> <p>In addition, modems on the kiosks required updating in 2016 and the pay and display modules requires significant number of paper rolls so that the receipt can be displayed on the vehicle dashboard demonstrating payment. Additionally, other items include batteries, unique cleaning material and an occasional solar panel component changing.</p>

<p><i>Narrative for Column # 4</i></p> <p>This account funds all repairs to the parking enforcement vehicle including routine maintenance such as oil and lubrication changes. Tires and other wearable items are purchased from this account. In the past, this account supported the expenses of Durham Public Works for providing mechanical services to the department. However, searching for opportunities to be more cost efficient and to lessen the workload on an often overwhelmed DPW mechanic who has large equipment to maintain and repair, resulted in the exploration of sending vehicles to Dover. The City of Dover has a large vehicle maintenance facility with the capacity to work on four vehicles simultaneously. Their expense ratio is similar to DPW and they have the capacity to perform the work much quicker.</p>
