

Durham Fire Department Offers Car Seat Safety Checks

Proper use of child safety seats can help keep our children safe but, do you know whether your child's car seat has been properly installed? According to the Safe Ride 4 Kids website, car crashes are the leading cause of death for children ages 3 to 14 in the United States. Many deaths and injuries can be prevented by proper installation of age and size-appropriate car seats and booster seats.

Firefighter Warren Kadden of the Durham Fire Department recently attended a certification-level course to become a certified car seat installer. He joins Fire Marshal Brendan O'Sullivan at the Durham Fire Department who is also a certified car seat installer.

The car seat inspection/installation service is offered to community members at no charge. To schedule a car seat installation or car seat safety check with Warren or Brendan, please call the Fire Department at (603) 862-1426 or (603) 868-5531.
