MEMORANDUM

TO: Michael Behrendt

FROM: Jim Lawson

DATE: September 24, 2013

SUBJECT: Updated Parking Use Data

SUMMARY

Data on parking use was collected in the downtown during the first three weeks of September (excluding weekends). This is the third time I have collected parking data since 2010, and this latest effort provides updated information on downtown public parking availability. Data was collected nine times focusing on the morning and early afternoon when use is the highest (based on past data).

Free and metered parking was always available in the Core Downtown, and never exceeded the 85% maximum utilization threshold recommended for downtown Durham¹. However, the data shows that increasing the use of downtown parking by only twenty-two spaces results in exceeding this threshold, which may require implementing a number of tactical measures to ensure parking is available without unnecessary traffic circling and driver frustration. Longer term, additional parking may be required. Potential tactical measures include:

- Requiring that proposed developments maintain the existing number of required spaces under zoning ordinance 175-112:A.2 "Central Business District Special Conditions Exemptions". *This measure could be implemented immediately as general Planning Board policy.*
- Installing new Kiosks on Main Street to manage the 1 hour of free parking in order to reduce parking abuse that impacts downtown businesses.
- Installing new Kiosks in the Tedeschi Lot.
- Limiting parking times or imposing higher parking rates (beyond 2 hours) on Pettee Brook Lane and Main Street near Huddleston Hall to discourage parking by persons with a destination on the UNH campus.

DATA COLLECTION TARGETS

Data was collected in the following parking areas:

Core Downtown

- Metered Parking
 - Main Street (south side) in the vicinity of Huddleston Hall
 - Pettee Brook Lane
 - Pettee Brook Parking Lot
 - Lower Madbury Road (across from the Post Office and near 9/11 Madbury Road)

¹ "Town of Durham – Parking Pricing & Management Report", TND Engineering, November 2011, Page 31.

- One Hour Free Parking
 - Main Street (north side)
 - Tedeschi Parking Lot
- Permit
 - Pettee Brook Permit Lot
 - Permit Area of the Pettee Brook Metered Lot
 - Cowell Drive

Outside the Core Downtown

- Metered Parking
 - Main Street (north side) in the vicinity of the Memorial Union Building
 - o Garrison Avenue
- Free Parking
 - Madbury Road (north of the Mathes Terrace intersection)

Data was *not* collected for the following parking areas and types of parking:

- Handicapped parking
- Commercial parking lots
- Post Office parking lot
- Jenkins Court
- Depot Road parking lot

PARKING USE INFORMATION

Appendix A provides the data collected for each parking area. The data shows that there was parking in all areas at all times with the exception of the free parking on Main Street. The was one occasion (Sept 13 at 11:15AM) when no free parking was observed on Main Street; however, there were six open parking spaces in the Tedeschi Parking Lot at that time.

Figure 1 shows the average parking use, average spaces available and minimum spaces available for key areas in the Core Downtown. Figure 2 provides a summary of the total free and metered parking utilization in the Core Downtown.

Parking Area	Average Utilization	Average Spaces Available	Minimum Spaces Available	2011 Utilization
Main Street (Free)	81.4%	5.8	0	79.9%
Tedeschi Lot (Free)	64.4%	15.7	7	64.0%
