Decero™ Design Intent

The **Madbury Common** bridge speaks a contemporary language with **sleek lines**, a **neutral color palette**, and **crisp customized finishes**. The 36 foot freespan structure glides over the waterway with contrasting finishes, such as the custom **gloss black** wrought iron panels, the **warm reds**, and **earthy browns** which compliment the facilities and surrounding **picturesque landscape**. This design performs structurally, aesthetically, and physically as a welcome feature to the Madbury Common's exquisite facilities.
