Subject: Solar Draft related

Dear Members of Planning Board, and Michael,

Thank you for your countless hours of effort to draft our Solar Ordinance. I have a couple of observations for you to consider:

- 1) Enterprise Systems should not be permitted in residential areas. There are well established reasons why zoning separates residential from commercial uses. Therefore we should not allow Enterprise Systems (which are commercial) in any residential areas.

- 2) Enterprise system when proposed for Vacant Land, or on a Farm, or in a large open Field should be required to get approval from the Durham Agricultural Commission, before applying for CU.

Thank you
regards
firoze
