Subject: Please watch video on College Brook
Date: Sunday, March 28, 2021 4:33:18 PM

Dear Members of the Durham Town Council and Planning Board,

I hope you will take the time to watch this locally produced video on the College Brook Watershed.

<https://www.youtube.com/watch?v=jFHwhO2a5tU>

In this video, local educator Ellen Ervin asks Professor Wilfred Wollheim, Freshwater Ecosystem Ecologist from the UNH, to talk about the College Brook, manmade impacts on it and how that impacts water quality downstream. He also shows how what happens locally can affect the entire watershed.

The video is 24 minutes and well worth watching but if you are short on time Prof. Wolheim begins talking at about 7:00 minutes.

Since the TC and PB will be making major decisions in the near future that will impact the entire watershed, I hope you will take the time to watch this interesting video.

Thank you for your ongoing diligence.

Beth Olshansky
