Re: Flowing Water **into** Plaza, **within** Plaza, and **out of** Plaza (80 seconds of video)

Below, please find annotated links to a **total of 1.3 minutes (80 seconds) of video** from December 5, 2020. *The first three videos were shot within 12 minutes of each other.*

With these videos, I attempted to replicate and expand on Sandra Hebert's November 23, 2020 College Brook [videos and text input](#). Ms. Hebert's observations led her to "believe that the flash flooding (of College Brook) may not be caused by the flow from UNH." And my observation and videos suggest that as well.

GENTLE UNH water flowing into College Brook at Plaza entrance at Mill Road
Dec 5 2020, 3:02pm (12 secs): <https://youtu.be/OPjvy9k12zo>

FLOODED walkway in Plaza, along College Brook, with parking-lot runoff overwhelming drains into the Brook, Dec 5 2020, 3:05pm (44 secs):
