

“This project entails repaving and re striping the parking lot at 35 Madbury in order to make parking more orderly. We are simply formalizing the current parking practices that have been in existence for decades. We are not adding spaces nor changing the traffic flow. The only noteworthy improvement we are making is to widen the passageway by pushing the existing parking spaces in the front 4 feet into front lawn area. This will widen the parking lot, improve access and better allow for emergency vehicles.”
