Subject: Mill Plaza development

Hello Michael,

I want to voice my STRONG opposition to destroying the wooded area by the church for a parking lot ("they paved paradise!"). Cutting down trees, especially to be replaced by ASPHALT, is extremely short-sighted.

As many climate scientists will tell you, planting a tree is one of the best CO2 controllers - one of the easiest things to do for climate change. At this tipping point in our planet's history,

I would hope that Durham will work as proactively towards climate health as possible, even if on a smaller scale. Truly, every tree matters.

Thank you, Eve Kornhauser
