Subject: Site visit on May 26.

We are requesting that the Planning Board visit the backyard of 5 Smith Park Lane during the site visit to help understand how close this proposed parking structure would be to our property. Also, in order to gain the full understanding of conditional use, it would be prudent for all to see the locations and heights from our property vantage point. We want to thank you for all the work and deliberation that has been put into this endeavor and being property owners yourselves, we believe you respect everyone's without the desire to devalue something we worked so hard for. Renovations done by the town all have seemed to benefit those whose property it abuts, but this proposal certainly lacks consideration for those most affected. I am concerned about my safety and no one should feel that way.

Thank you again,  
Sandy Ceponis Urso
