Re: Gerrish Extension

Michael,

While there is mention of another site walk for the PB from the intersection of Ambler and Gerrish, there is still no mention of a site walk from the Bagdad Access, despite several requests from abutters and other residents of this neighborhood, and despite the acceptance of a Bagdad-originated site walk by the Project Engineer, Mike Sievert, and the applicants, the Mulherns (neither of whom is enthusiastic about it but said on the record that it could be done). Additionally, there is still no mention of independent scientific expertise from an independent wetlands scientist/ecologist and an independent hydrologist, both of whom are needed to assess both the immediate and the broader impacts of this proposed project. The Conservation Commission also has this need, in addition to the Planning Board. The time has come to act on it.

John
