Subject: Gerrish Extension and Subdivision - Support for plantings in wetlands and site walk

Hi Michael and Mike,

Mike, thank you for the presentation last night and response to our questions. We just wanted to provide our support for additional plantings within the wetland on our 20 Ambler Way property as you detailed last night and as NHDES recommends. Related, we were also supportive of the additional plantings proposed by Robbie and yourself within the ROW. As always, Molly and I are happy to engage with you and the Mulherns in this process.

Michael, since this came up at the Conservation Committee meeting, cc'ing you if this has relevance to the Con Comm's discussions on the proposed application. Also for the site walk on January 13th, since the ground may be uneven especially with snow/ice, anyone who is less sure footed can use our driveway as an access route. Though we would encourage anyone who can to walk through the ROW wetlands for the full experience.

Warm regards,

Mike & Molly
