Subject: Main Street #19 - charging station
Date: Monday, March 21, 2022 5:47:27 PM

To the Planning Board,
19 Main Street is proposing to provide wiring for one parking space for electric charging. I hope that we can increase this to more than one space and actually have it set up and ready to go.

Also, I learned recently that if wiring alone is provided it should be underground circuit to space for a Level 2 minimum and or even Level 3. A level 1 110 volt is not sufficient.
