Town Planner's Review
Wednesday, April 22, 2026

- X. **Architectural Regulations.** Continued review of proposed changes to Architectural Design Standards in Site Plan Regulations.
- I recommend that the board continue its review of the changes suggested in the document prepared by Beth Olshansky and Robin Mower.

The board got to the bottom of page 20 in its review on April 8. As I noted, once the board finishes going through this document I will prepare a revised document for further review, incorporating the changes the board makes to the document and other suggestions, including comments that I have received and my own recommended changes.

Once the board has completed a full review, we can put the revised document out for public hearing. The Planning Board can adopt it on their own following a hear.
