- **RE:** Review of Pedestrian Accidents in the Downtown Area

The matrix below is an updated list of all reported pedestrian accidents in the downtown area between the railroad overpass on the westerly side of downtown and the intersection of Main Street and Route 108 to the east. The report includes public access parking lots in the immediate vicinity that have reported pedestrian events. In addition, the report identifies where the pedestrian was located at the time of collision and the factors that may have contributed to the event. All of the pedestrians were injured to varying degrees and transported by ambulance to Wentworth-Douglas. All vehicle operators were issued summons for failure to yield to a pedestrian if the pedestrian was in the crosswalk, unless subsequent investigation reveals that a summons is not justified. During this period there have been three pedestrian fatalities with one occurring each year in 2004, 2008 and 2015.

While this document was initially developed in 2003, it has been updated periodically to maintain an accurate portrayal of accidents involving pedestrians between the years of 1996 – 2018.

Date – Time	Location of Accident	Pedestrian Location	Cause of Accident
01/07/96 (9:02AM)	Main/Garrison	Crosswalk	Driver inattention
06/2196 (4:20PM)	Main/Mill	Crosswalk	Driver fail to yield

Interesting Data

- Ninety (90) pedestrian accidents have been reported to the Durham Police within the calendar years of 1996-2018.
- Sixty-four (67) of the pedestrian accidents occurred while the pedestrian was within a crosswalk (74%).
- Fifty (51) of the accidents occurred in areas where two-way traffic existed (57%).
- There have been three (3) fatal pedestrian accidents during these years with two pedestrians not in a crosswalk and the one within.
- Forty-four (44) of the accidents occurred during daylight hours (48%)
- Seven (7) of the accidents were attributed to "solar blindness" during sunset or sunrise occurrences (8%).
- Sixty-nine (69) of the accidents occurred in *clear* weather (76%)
- Twenty-one (21) of the accidents occurred when the weather was *cloudy* with or without precipitation. (26%)
- Posted speed limit at all locations is 25 MPH, except one fatal on Route 4
- Each year there is an average of 3.75 pedestrian accidents. In 2015 there were more recorded accidents involving pedestrians with ten (10) than any other year in the study. Previous to this year, the years 1999, 2008, 2014 and this year, 2018 each had six (6) accidents. The years 1998, 2001, and 2009 had the least with only one (1) accident.
